651 Project Proposal

Mary Peng, Hillary Dunn, and Max Kearns

November 25, 2018

Notes:

Implement 2 methods in the analysis

last 2/3 summer olympics, how it changes over time? or should we just do a single

explore how each beta term affects the medal count.

variables: gdp population per capita sports investment

Sections: intro: How do economic indicators corelate with their performance at the summer olympics? what questions should we address? how do these things vary over time? get into different sports? track and field vs swimming? teams sports vs individual? what methods will we use? link to data
